

You will need

- Large tray (or even in the bath)
- Water
- Jugs, funnels, containers

1

Allow your child to enjoy playing in the water – just like an elephant does! If in the bath why not use the shower hose and show your child what the elephant does with their trunk. If playing in a large tray, allow your child to pour water from one container to the other. Babies love playing with water! If the weather is nice, why not get the tray in the garden and allow your child to sit in it.

You could also encourage your child to help you wash the car, or their bike/scooter if they're older. Perhaps teach them to help with the washing up too!
